

Dental Model

Bigger bottles for high-volume production

Labs, orthodontists and larger practices print a lot of model resin and often need to repurchase material. To improve resin management, dental professionals can now use Dental Model resin in 3kg containers. This 3D printing material excels in durability, accuracy, and speed, becoming a crucial tool for modern dentistry.

SprintRay Dental Model resin produces robust models with superior surface finishes, ensuring precise, smooth, and accurate patient treatment evaluations. It supports both horizontal and vertical printing, allowing for high dimensional accuracy.

Enhance your practice's efficiency with our resin's fast printing capabilities, significantly cutting down production times. The high-contrast colors, Dune and Graphite, make details crisp and distinct, aiding in precise adjustments.

Discover the power of advanced 3D printing with SprintRay Dental Model Resin and propel your practice into the future.

FLEXURAL STRENGTH*

Higher flexural strength ensures that the model doesn't break during normal use.

FLEXURAL MODULUS*

Higher flexural modulus prevents distortion, which can impact accuracy.

SKU Numbers:

- SRE-0620001: Dental Model Dune – 3 kg**
- SRE-0620002: Dental Model Graphite – 3kg**

KEY ADVANTAGES

- Accelerated Printing Speed**
Over 20% faster print times compared to previous technologies
- Superior Surface Finish**
Achieve models with a smooth, impeccable finish that not only looks great but also functions optimally, ensuring patient satisfaction
- Enhanced Mechanical Properties**
Improved flexural modulus and strength provide high durability
